Engine and game developer with experience working on simulation. Comfortable with rendering, gameplay, Unity C# and Unreal engine C++ & blueprint, and enjoy physics calculations, animation programming and motion capture.

🧠 Skills

Game dev specialities

Rendering / HPC / Simulation

Programing languages

C++ / C# / C / Python / CUDA

Engines

Unity / Unreal 4 & 5

Versioning

Git / Perforce

Graphical Libraries

OpenGL / Vulkan / 3DX12

👛 Experience

Unreal Engine developer, *Sirene games*

Participation in the creation of a independent game, tutoring less experienced developers and working with a varied team of developers, artists and game designers

Mar 2026 – Jun 2026

Paris, France

Tech artist and Gameplay programmer, *Bright*

Worked on a mobile game named Jolibrain on Unity
Developed tools and made a lot of optimisation, I also worked as a tech artist to improve visuals.

Mar 2025 – Nov 2025

Paris, France

Unreal Engine developer internship, *Côte D'Azur University*

Research on air and sound polution.
Developed a polution simulation and rendering software,
Leading the project along with a 3D artist intern.

Oct 2023 – Jul 2024

Nice, France

📁 Projects

Escape Atlantis, *VR Game*

Creation of a VR horror game.
I mainly worked on the tech art part, animation programming and rendering optimisation and made the build pipeline for meta quest 2 VR headset.

Oct 2024 – May 2025

Soft Engine, *Engine*

Creation of a soft body simulation at world scale
My main tasks are mesh conversion, lighting and physics calculations

Oct 2025 – Present

🎓 Education

Master' degree in game programming, *Isart digital*

School of video games & 3D films.

2021 – 2026

Paris, France

🌐 Languages

French

Native

English

Professional proficiency

Spanish

Basic working knowledge

Japanese

Basic knowledge

🎵 Hobbies

Sciences

Astronomy, Physic and programming

Sports

Artistic fencing, snowboard, climbing

Games

Strategy, gestion, trading card games and tabletop RPG
